Kiev is safe (<https://www.mywanderlust.pl/visit-kiev-ukraine/>)

There's this stereotype that Eastern Europe is unsafe. With the recent war in Ukraine Kyiv is considered by many to be a super dangerous place.

Even before the recent revolution I got worried comments and looks from my closest family and friends, asking what I'm getting myself into with the idea of traveling to Kiev.

Well, this couldn't be farther from the true.

While every now and then we get news of some incidents happening in Kiev (don't they happen just about everywhere?) I feel very safe in the city and there wasn't even one situation when I felt something is wrong.

Of course, you need to be careful, like everywhere else, it's a big city after all. But I don't think there're any major threats or issues you need to be aware of.

I wrote the whole article about [safety in Ukraine – you can read it here!](#)
